Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This office action is in response to the amendment filed February 10, 2003 in which claims 22-28 were added.

The rejection of the claims under 35 USC 102(b) is withdrawn in view of the certified translation of the foreign priority document.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 22 and 23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The example that applicant relies upon recites "a" as being 25 and not 26.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13, 15-18 and 20-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell (US 4,527,996).

Campbell teaches a gasoline composition comprising a nitrogen-containing additive of the following formula $H(OCHR'CHR'')_x(OCHR'''CHR^{iv})_yNR^vR^{vi}$ wherein R' and R'' are independently H or an alkyl group of 1-4 carbon, at least one of R' and R'' has at least 2 carbon atoms; R''' and R^{iv} are independently H or CH_3 , R^v and R^{vi} are independently H or $(CH_2CH_2NH)_zH$ where z is 1-5 with the proviso that R^v and R^{vi} are not both hydrogen and z and y are independently integers from 1-30 (see abstract; col. 3, lines 1-20). Campbell anticipates the claims when in Campbell all parameters are as set forth with $Z=1$, and those parameters in the present invention are as follows: R' is H, R^2 - R^5 are H or C_1 - C_{16} hydrocarbon, a is an integer from 1-20 and x is (B1) or (B4) wherein R^{15} is C_2 alkylene, R^{16} is H and R^{17} is H.

Accordingly, Campbell teaching all the limitations of the claims, anticipates the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Campbell.

Campbell has been discussed above. Campbell fails to teach the claimed method for controlling deposits formed in a combustion chamber of a direct injection gasoline engine. However, it would have been obvious to one of ordinary skill in the art to have used the composition in a direct injection gasoline engine because Campbell teaches that his fuel composition controls deposits in internal combustion engines, which includes direct injection gasoline engines.

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on February 10, 2003 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
